THE GREATEST INVENTION OF THE AGE. West's Patent Galyanic Cement For Roofing.

THE subscriber is now prepared to cover roofs of buildings, with a new and better article than ever before known. The public are aware that our Government has had scientific men experimenting, and that it has been the study of Architects and Builders, for years, to discover an article for roofing purposes, that would stand the sudden changes of the weather, and be impervious to fire and water, and remain a permanent fixture. As yet, nothing has been attained without costing more than the people wish. The contraction, expansion and rusting of metal roofs, are so great in changeable climates, that they become uscless, unless being repaired at great expense yearly. Shingles are not fire proof, and cannot be used on flat roofs, and the various Compositions and Cements that have been brought into use for roofing, do not stand the action of the weather, but they run when it is warm, and crack when frosty, and after one or two years become crumbly, and worthless; whereas, the inventor of the Galvanic Cement, has labored twenty years to combine articles to obviate those difficulties, and can tealify from his long experience, and numerous testimonials from reliable persons, who have had his combination applied to their buildings, that bis Cement is the cheapest and best aticler ever before known. The combination of this Cement is such that it is calculated for entire new roofs, flat or steep, covering over old shingles without removing them; lining exve-troughs, seaming around battlements, chimneys and aky-lights. Covering car-tops, steamer-decks, &c. This Cement, by its non-conduction and galvanism, prevents metal roofs from rusting and unsoldering, and resists the extremes of heat and cold, better than any thing ever invented, for entire roofs or for covering metal and the out side of wood buildings, making them fire proof. Its appearance is like slate; beautiful for the rich palace or the humble cottage.

The subscriber is also prepared to cover roofs of buildings, in any part of the State, at short notice.

MEMPHIS, March 12, 1857.

MR. W. S. BENNETT.—When in Philadelphia, Pa., a few days ago, I called upon Mr. Samuel Sloan, the celebrated Architect, and author of the Sloan Work on Architecture. I asked his opinion as to the durability. &c., of West's Patent Roof, such as you are using in the city of Memphis, and he told me that he had no hesitation in saying to me that it is a good and durable roof, and is all that its advo that it is a good and durable roof, and is all that its advo cates claim it to be; farther saying that he is using it on a fine building for himself. Respectfully,

JOHN L. MORGAN, Architect.

MEMPHIS, March 2, 1857. W. S. RENNETT, Esq.—Dear Sir.—The facts within our knowledge of the durability, &c., of West's Galvanic Ce-ment; are these: The building you covered for us last spring. I am happy to state tas ans ered our expectations. We can therefore, recommend it to the public for all roof-ing purposes; as a light, cheap, fire and water proof roof. It does not get soft and run from the effects of the heat of the sun; nor does it harden and crack from the effects o ticle, can call at our manufactory.

To WHOM IT MAY CONCERN .- This is to certify that W. S. Bennett covered two roofs for me last spring, with a com-position called West's Patent Galvanic Coment one of then was a new deck, the other an old shingle roof, which are giving perfect satisfaction. He also repaired a dor-mer window, which leaked badly, and had bailled the skill of Carpenters to prevent its leaking, which he succeeded in making perfectly tight. I so most cheerfully recom-mend his more of roofing to the public, for all roofing purposes, and believe it to be a permanent fixture agains fire and water.

MR. BENNETT, - Dear Sir: - Our company having been Patent Pafut upon them, and so far as my knowledge extends, I can cheerfully recommend it to any who wish a dry roof of any sort.

H. COFFIN, Superintendent.

MEMPHIS, TENN., Jan. 14, 1857. To THE PULLIC.—W. S. Bennett, made a plication to us last summer to cover our buildings with West's Galvanic General: it being a new thing, we thought we would try it; had it applied to our Blacksmith Shop, and Engine House, attached to the Foundry. They have proved all required of a water proof roof, having withstood some of the greatest storms, and are giving good satisfaction. We can only add, try it and you will be satisfied.

CURTIS & KNAPP, Iron Founders.

MEMPHIS, Jan. 14, 1557

TMr. Bennett, has done some small amount of roofing for me in his peculiar way, with Cotton stuff, coated with a preparation the basis of which appears to be a Coal Tar. It is a very effectual and light roof, and appears to promise considerable durability, from the preservative qualities of the composition, which penetrates the cloth and protects it from the influence of the air and water. The Composition does not liquify and run from the effects of the heat of the sun in summer; nor does it harden and crack from the influence in the cold of winter.

PATENT ELASTIC FIRE & WATER-PROOF

CEMENT ROOFING. THE undersigned is prepared to introduce into use in Tennessee W. E. CHILDS & CO.'S PATENT ZLASTIC FIRE AND WATER-PROOF CEMENT ROOFING, and ask the attention of Architects, Builders, Railroad Companies, and the public to examine its superiority over other ARCHITECTS AND BUILDERS should not fail to examine this Roofing, as it is better and cheaper than any thing in use. The material forms a hard and smooth sur-face that will resist the action of the atmosphere in every timate. It is impervious to water, elastic, and flexible. It contracts and expands with the changes of the atmosphere, and will neither evaporate, crack nor rot; and, as to phere, and will neither evaporate, crack nor rot; and, as to its durability, there is no question.

It is practically imperishable, and will perfectfully resist any ordinary external exposure to fire, as is abundantly proved, and we will warrant it water-proof. We will engage to put our Roofing on over ordinary good sheathing, old shingles, tar and gravel, tin, sine, copper, or iron roofi—it making no difference how steep or flat they may be—for each public per one housted source feet, they for seven dollars per one hundred square feet; it being far cheaper than any lloof of the old style, and we are sure it

will give better satisfaction.

It will also be found to be the best thing ever invented to cover or mend old leaky tin, tar and gravel roofs, or around chimneys, southles, dormar windows, and gutters, where the tin is rusted through. This Cement can be put on to last as long as stone, and form a perfect adhesion to any ob-ject to which it is applied. Tin Roofs can be painted over (and warranted not to leak) at two dollars and fifty cents (and warranted not to leak) at two dollars and fifty cents per hundred square feet, which is cheaper and much better than paint. This Roofing will be found to be the best theng for covering large Roofs where they are exposed to fir—such as Steam Mills, Baw Mills, Factories, Railroad Cars, Bridges, Depots, Station Houses, Steamboat Decks, and, in fact, every kind of Roof where there is an external exposure from fire. As the Roof is perfect, without a joint it, it presents no chance for fire to communicate, and any ight substance will burn out without igniting.
